

# Agpoint Australia

## Tine Assemblies & Seeding Systems

Recommended Retail Price List No. 173 Effective

### Agpoint

#### Part No.

#### **Air Seeder Diffusers - D-Cup**

D-CUP Diffusers remove the *speed* from the air-seed mix in the very last stage of distribution. Gravity will then gently drop the Seed (and/or fertiliser) through the final 16 inches (approx.) of the delivery and boot assembly. Better, more even germination can result through reduced seed bounce and more accurate seed placement.

*D-Cup Diffusers can help to visually identify boot blockages from the tractor cab.*

**DF110** D-CUP Diffuser **Single** hose Inlet set - NO mount clamp assy.

**DF110 D-CUP Diffuser**  
Single hose Inlet set
