

Slimwedge Sweeps, Knife Points & Seeding Systems

Your Start Up Kit Starts Here!

With Quick & Easy Adjustment

Agpoint's new extendable seed & fertiliser delivery attachment adapts in just seconds for use with either knife points or sweeps.

No Spanners Required!

From A Sweep To A Knife Point

Use The Agpoint Seed & Fertiliser Delivery System!

Agpoint's new extendable seed and fertiliser delivery system adapts in just seconds for use with either knife points or sweeps. Spanners are not required. An extendable seeding delivery attachment has also been developed, to compliment the slimwedge locking system and quick change features of the Agpoint range.

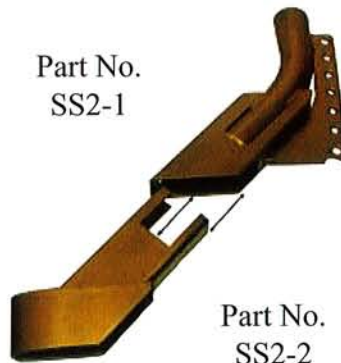

The unique feature of this seeding/fertiliser boot attachment is that it adapts to changes in cultivation depth as quickly as it takes to knock on a knife point. The seeding boot extension piece, required for accurate seed or fertiliser placement when using a knife point, is automatically locked into place by the knife point itself when it is attached to a tine using the Agpoint Slimwedge System.

The extendable seeding delivery attachment solves the problem of farmers having to get the spanners out to adjust or add the seeding boot extensions. The extendable seeding delivery system fits most popular double bolt hole, flat on or edge on cultivator tines, and adapts to all commonly used flexible seeding tubes.

Complete Assembly
for sweep only use

Part No.
SS2-1

Part No.
SS2-2

Complete Assembly
for knife points

From this to this in seconds?

Step 1. **Do I want to use a sweep or a knife point?**

- (a) If you want to use a sweep only, use SS2-1 as pictured above
- (b) If you want to use a knife point, you will also need the extension SS2-2
- (c) If you want to double shoot, you will also need a SS2-3 Flexi Boot

Step 2. **What Slimwedge Adaptor Do I use? Listed below are the options**

15553: 43 degree wedge adaptor with 2 x 7/16" bolt holes at 44.5mm (1 3/4") centres

15554: 47 degree wedge adaptor with 2 x 1/2" bolt holes at 44.5mm (1 3/4") centres

15555: 47 degree wedge adaptor with 2 x 7/16" bolt holes at 44.5mm (1 3/4") centres

15556: 50 degree (long) wedge adaptor with 2 x 1/2" bolt holes at 57mm (2 1/4") centres

15557: 47 degree wedge adaptor with 2 x 1/2" bolt holes at 57mm (2 1/4") centres

15558: 50 degree (short) wedge adaptor with 2 x 1/2" bolt holes at 57mm (2 1/4") centres

Refer Agpoint Price List for application guide

Knife Point & Sweep Options

Step 3. **So What Sweep & Knife Point Options Do I Have?**

(a) SWEEPS:

The M8T Slimwedge range offers sizes from 2” all the way through to 14” and includes the patented locking system that guarantees the sweep will not fall off when used with the Agpoint cast adaptor and retaining clip.

M8T Slimwedge

The M9T Marathon is another unique sweep to Agpoint. This sweep has a low profile for minimum soil disturbance, a revolutionary design for maximum weed kill and curved wing protecting the seed trench. The chisel nose guarantees penetration and the curved wing helps maintain its total width. Also with the patented locking feature in sizes 8” through to 14”

M9T Marathon

(b) KNIFE POINTS:

Agpoint Australia has developed a wide range of knife points with both Ag-Tuff and Tungsten Tile variants.

M8THDP 47 Degree Heavy Duty Knife Point

This straight knife point sits at approximately 47 degrees and is available in two blade lengths for a 4” and 6” working depth. It is available in Ag-Tuff, light duty tungsten and the heavy duty model with up to 3 tungsten tiles (6”) and Ag-Tuff combination for optimum life.

M8THDP Knife Point

M8THDPS 70 Degree Heavy Duty Knife Point

This knife point sits at approximately 70 degrees and is also available in two blade lengths for a 4” and 6” working depth. The feature of this knife point is it produces less soil disturbance and is better suited in those stonier conditions. Only available in the Heavy Duty Tungsten version with 2 heavy duty tiles for the 4” model and 3 heavy duty tungsten tiles for the 6” model.

M8THDPS 70 Degree Knife Point

M8TWS Wing Seeder Knife Point

The Wing Seeder knife point is available in 2 sizes for either a 4” or 6” working depth and is available in Ag-Tuff for non abrasive applications or the Tungsten options for maximum life.

M8TWS Wing Seeder

M8TCCA Cast Seeding Carrier & Assembly

The M8TCCA is available in a standard form with a replacable 2 tungsten tile + Ag-Tuff cast boot combination or the carrier can be purchased separately with an option of five cast boots available with up to 8 tungsten tiles on the 32CSB option.

M8TCCA

Retaining Clip & Removal Tool

Step 4. Order The Retaining Clips & A Removal Tool

M8T-RC: This retaining clip is an integral part of the patented locking system developed by Agpoint to ensure that none of your tillage tools are lost, even in the toughest of conditions.

All for just a few cents!

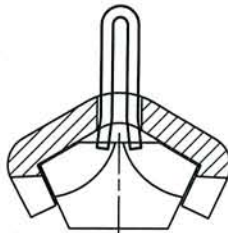

M8T-RT: The removal tool is a low cost tool for easy removal of the retaining clip.
Use safety glasses and gloves at all times.
