

SCHUMACHER CROPLIFTERS

The Schumacher croplifter is available to suit most finger guards used in Australian harvesting operations. They are quick and easy to fit, increasing machine and operator efficiency at the peak of harvest.

Height and/or angle adjustment is achieved quickly and easily by repositioning the spring clip to one of the three operating positions. (pictured below)

Choosing a croplifter to fit your guard

For the best fitting of the croplifter just follow these two simple steps.

1. Measure the guard length - from centre of the bolt hole to the tip of the point. (shown above)
2. Select the croplifter which best matches the guard length and choose the croplifter from the list below.

Part No.	Description
----------	-------------

SCHUMACHER CROPLIFTERS

Standard Croplifter

- 86016445 ASK100
- 86016587 ASK120
- 86016588 ASK121
- 86016589 ASK127

Accessories

- 86010237 Spring Clip

- 86010248 KM-3 Spool & Bolt Kit

All crop lifters must be checked once fitted for correct alignment prior to use.
