

Upgrade your existing Schumacher cutting system with roller guides.

If you own a Schumacher cutting system already, you can simply upgrade it with roller guides and gain the advantage of a great knife guidance. Choose your option of rollers along with the new shortened wear plates.

ident-no. 16330

R1 top guiding roller

The top guiding roller R1 holds the knife in a straight line, preventing the section from tipping downwards. This protects sections and guards from wear.

ident-no. 15768

R2 bottom guiding roller

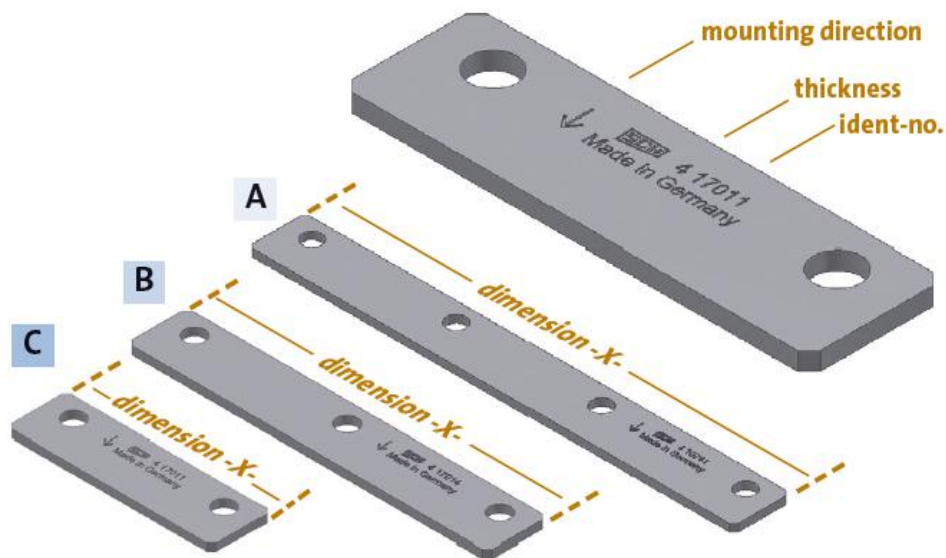

In combination with the top guiding roller, the bottom guiding roller takes care of the knife guidance instead of the wear plates only. This means less friction, less vibration and less wear on the drive unit.

Roller guide R1 R2 | Wear plates

The new wear plate.

In the new shortened version applicable as either a wear plate or a spacer bar.
