G'Day Valued Dealer Network, In This Months October Update We Will Look At Bolts.

We have in our range bolts to hold our points and sweeps on to the tine of the shank of the machine. All bolts are grade 8 and supplied with standard nuts only.

We also stock a range of U-bolts; these are available to suit square and rectangular RHS frames from 3 1/2" to 8" in size and are available in different diameters. U-bolts are supplied with standard nuts and spring washers. All dimensions are listed in the price list.

BRH Cup Head Bolt

- Available in 1/2" diameter only.
- 3 different lengths.
- Used with Scarifier sweeps.
- Measure under the bolt head to the end of the thread to determine the bolt length.

Crushed Head Bolt

- Available in 7/16" diameter only.
- Used with 61u and 65 chisel series.
- Measure from under side of the head at the highest point to the end of the thread to determine the bolt length.
